

CAN'T WAIT TO READ.

KANSAS HEALTH
FOUNDATION

IS YOUR CHILD ONE OF THE
2 OUT OF 5
WHO WILL START KINDERGARTEN
UNPREPARED
————— **TO LEARN?** —————

Children who start school without being introduced to reading face a challenging first year. But much worse, they tend to get further behind year after year. Their chances of completing high school are low. They'll find their life choices severely limited.

But it's so easy to prepare your child for a healthy, happy life with plenty of opportunity.

Start now. You don't have to teach your preschooler to read. Spend just a few minutes a day with a book, telling stories, singing songs or playing word games — soon, your child will tell you they just *can't wait to read*.
